fireplaces and  
woodstorages

by dens

Dens designs and customizes on request garden products, beside the Zeno Products label, and performs a number of fireplaces and woodstorages under the bydens label. These products can be delivered under private label of the wholesaler or importer. The outdoor fireplaces are made of Corten-A steel. This is a special steel alloy of which copper, phosphorus, silicon, nickel and chromium are added. It forms a natural oxide layer (rust layer) which protects the underlying material and is very durable. The fireplaces are in the beginning but steel color and fade quickly from orange to dark brown. Obtained by firing the stove gets specific warm colors. All outdoor fireplaces come with a perforated bottom plate and double walled back.
